MRCMC July 2nd 2025 Meeting Minutes

Board meeting- The board meeting and General meeting were combined and started at 7:30pm.

General Meeting- Dennis Albee called the General Meeting to order at 7:30pm.

Members present – Lee Gommley, Bob Hill, Ken McNurlen, Mike Curreri, Mike Wentworth, Greg Gavit, Dennis Albee, Kevin Alfonso, Frank Lee, Robert Schroeder, Ron Helmer, Karl Eckerle, Jim Clark, Mike Moore, Bob Ebach.

Visitors present– Welcome Brian and Abram Davis!

Last meeting minutes- approved.

Treasurer report- approved.

Old Business

- **Tri-folds** - Kevin and Ron. The official professionally printed tri-folds are out and available for club members to hand out. The dates were removed so drive people to view the website so the fliers are good for more than this year only.
- **Electric Fly Report** – The fly went well with many electric aircraft at the field.
- **Mower Repair** – Karl Eckerle. Both mowers are repaired and functioning normally.
- **Runway repair** – Karl and Frank – All the cracks were cut out and filled in. Two days work in the sun and heat but the runway is back in good condition. One gallon of filler is left for future repairs.

New Business

1. AMA Introductory Pilot Program – Ron H. We have a program in place at this time. Currently there are three student pilots. Karl and Ron will discuss how we are contributing to this program in our club currently. What was read in the magazine is that aircraft and equipment will be furnished to the student pilots as incentive to continue their membership in the club/AMA. Ron has correspondence from the AMA requesting names of students, he will find out from them what the program's benefits to our student pilots.
2. Civil Air Patrol Rocket Launch – August 14th @ 6:30pm Ron H. A meeting was held with the CAP for them to have a rocketry event like the cub scouts do, but with less members present. They are excited to fly their rockets

at our field. There was interest for them to set up a display at our airshow this year as well. The young membership is very interested in drones, so a partnership with them will benefit the club and community as well. The secondary date in case of inclement weather is August 21st at our club. We would like some flying demos by our members after they launch.

3. Family Picnic – Kathy G. Hot dogs and Brats will be served and bring a dish to pass. Starts at noon July 13th.
4. Combustion fly at 9am on August 2nd. Hamburgers will be provided, bring a dish to pass. No electric motors other than on starters.

Program

None.

Meeting Adjourned- by Dennis Albee at 6:58pm.
